Scientist, Pharmacologist (Early-Stage Drug Discovery and Development Psychedelics)

Calgary, AB

About Enveric Biosciences Inc.

Driven by Compassion. Rooted by Nature. Refined by Science.

Enveric Biosciences (NASDAQ:EVNB) is an innovative biotechnology company developing a next-generation mental health and oncology treatment clinical discovery platform, leveraging psychedelic-derived molecules for the mind and synthetic cannabinoids for the body. Enveric Biosciences' robust pipeline supports drug development form the clinic to commercialization for millions of patients in need around the world suffering from conditions that include cancer-related distress, PTSD and more.

About The Opportunity

There is a revolution happening in mental health, treating indications such as depression and PTSD. Would you like to join an innovative and growing company whose goal is to make a positive impact on human health? Are you interested in applying your skills to cutting edge R&D?

Enveric Biosciences is seeking a full-time scientist to support in the design and implementation of early stage in vitro and tissue culture discovery-based assays to evaluate the novel psychedelic drug candidates contained in the Psybrary™. As part of our Research & Development team, you will have an opportunity to contribute your ideas, and have an impact in the development of novel medicines for the treatment of mental health indications.

This position is based at our office in Calgary, Alberta.

About The Candidate

Our ideal candidate is an enthusiastic, team player with a strong background in pharmacology, neuroscience and early stage drug development for brain and mental health indications.

Key Responsibilities:
- Supporting in the development and execution of the discovery-based testing of novel mental health drug candidates.
- Work collaboratively with a multidisciplinary scientific team involved in the preparation and pharmacological testing of novel compounds.
- Troubleshoot and solve experimental problems.
- Maintain accurate records and documentation.
- Communicate effectively with scientific team members and company management.

Education:

MSc or PhD in pharmacology, neuroscience, or related disciplines

Experience:
- 1-3 years' experience in a biotechnology or pharmaceutical setting.
- Experience testing novel neurological drug candidates.

Core Competencies:
- Knowledge and experience with state-of-the-art pharmacology models and techniques.
- Strong interpersonal and communication skills.
- Experience in early drug development and drug candidate screening. Brain and mental health drug development experience is preferred.

The successful candidate will have a strong interest and willingness to learn about psychedelics.

To Apply

Enveric Biosciences offers a competitive compensation and benefits package, a dynamic work environment and a great team! Please visit our web site at www.enveric.com for more information about our company.

To apply for this position, please send your **resume and cover letter** to careers@enveric.com.

Enveric Biosciences is equal opportunity employer, committed to an inclusive, diverse and accessible workplace. Accommodations are available on request for candidates taking part in all aspects of the selection process. To request accommodation, please contact Human Resources.

We thank all applicants for their interest in Enveric Biosciences; however, only candidates selected for interviews will be contacted.
